TRADE-MARK INDUSTRIAL INC. MOVING TO 365,000 SQ. FT. FACILITY.

New, centrally-located home will enhance efficiencies and ability to respond to customer needs.

Kitchener, Ontario August 13, 2014 – Trade-Mark Industrial Inc., a Kitchener, Ontario-based, family-owned, multi-trade contractor serving primarily Southwestern Ontario, is moving to a 365,000 square foot building situated on 24 acres. The company's new home will be conveniently located at 250 Royal Oak Road in the Cambridge Business Park near the 401 expressway and becomes the headquarters for all of its companies—Trade-Mark Industrial Inc., Trade-Mark Industrial LLC, TM3 Inc. and United Electric. The transition to the new facility will take some time and as a result will be conducted in phases commencing October of 2014.

“Trade-Mark is going through a planned expansion stage right now. As a result of this process we realized our present buildings, yard space and layout were inadequate and inefficient,” explains Russ Straus, President and Founder of Trade-Mark Industrial Inc. “After months of searching and negotiating we have acquired a new business location that will allow Trade-Mark to consolidate all of our companies and operations under one roof and accommodate our future growth needs.”

Trade-Mark is known throughout the industry for their ability to provide 24/7 service whether their

clients require project support, motor rewinds, trade services or equipment rentals. “Here at Trade-Mark one of the foundations of our success has been our ability to respond to our clients’ needs in a timely, professional manner,” states Dan Straus, Vice-President of Finance at Trade-Mark Industrial Inc. “Moving our operations to 250 Oak Road will allow us to enhance that capability. The new, larger facility will create office, equipment and IT efficiencies and the location itself is just minutes away from Highway 401 and interchanges at Highway 8 and 24. This means we’ll be able to reduce the time it takes for our equipment and crews to physically arrive on site.”

The move to 250 Royal Oak Road will benefit Trade-Mark, their clients and the local economy too.

“Growing our business is a key component of our company strategy going forward,” says Russ Straus. “As our business expands we’ll require more employees. By making the move to the larger facility we will have the room to accommodate the addition of new tradesmen and office staff to our team.”

About Trade-Mark Industrial Inc.

Established in 1998, Trade-Mark Industrial Inc. is a Kitchener, Ontario-based, family-owned, multi-trade contractor serving industrial, commercial and institutional customers primarily in the Southwestern Ontario marketplaces however they also have the resources and capabilities to provide services across Ontario, Canada and the United States as required. electrical, piping, sheet metal and HVAC installations, machine shop services, repair solutions and customer storage/warehousing. Trade-Mark prides itself on supporting their customers every step of the way. To deliver on this promise, Trade-Mark provides 24/7 emergency service to their clients, this includes: project support, unplanned motor rewinds, trade services and equipment rentals. Trade-Mark employs over 400 experienced, certified tradesmen and operates a fleet of over 150 fully-equipped service vehicles. Trade-Mark is also actively involved in many industry associations.

In October 2014 the company will start moving into their new 365,000 sq. ft. facility situated on 24 acres in Cambridge, Ontario. These facilities will house central management and administration, a sheet metal fabrication shop, a custom miscellaneous metals fabrication shop, a pipe fabrication shop, an equipment assembly shop, an electric motor rewind and sales shop, a custom machine shop, a tool and equipment shop, an in-house vehicle repair shop and indoor, climate controlled tool and equipment storage.
